 Effective Date 10-12-06  
 Uncontrolled when printed

**FOR BMC USE ONLY: 7.1 Control of Product Realization**

- Y Does the product defined here in contain special quality objectives or requirements including inspection, testing, packaging, installation, or product delivery requirements? Circle Y for Yes or N for no.
- Y Does the product defined here in contain special process steps or require special resources including test or inspection equipment, gages, or processes? Circle Y for Yes or N for no.

If the answer to any of these questions is yes, product realization planning is required and the individual that answered "yes" (usually the sales manager) is responsible for calling a planning meeting as defined in ISO procedure 7.1. Realization planning notes are to be made on, or attached to this form and retained in the customer quote file as a quality record.

8. Standard trays are galvanized with clamps on the inside edges of the tray. For delicate parts or special applications, please contact us for more tray options.
